

Virto Industrial Supply

Returns and Warranty Policy

Effective 1 January 2026

Virto Industrial Supply — effective 1 January 2026. This policy sits alongside clauses 6 and 7 of the Terms and Conditions of Sale.

Request a return material authorisation from your account representative or at returns@virtoindustrial.example.

Commercial in confidence — for the named account only.

Returns

1. Return material authorisation

No return is accepted without a return material authorisation (RMA) number. Request one from your account representative or at returns@virtoindustrial.example, quoting the invoice number, part number and quantity. An RMA is valid for 30 days from issue. Mark the number clearly on the outside of every carton.

2. What can be returned

Unused stock items in original, unopened packaging, within 60 days of the invoice date.
Items supplied in error or damaged in transit, notified within five working days of delivery.
Warranty claims under clause 6, at any point in the twelve month warranty period.

3. What cannot be returned

Special-order items sourced specifically for the customer.
Cut-to-length product, kitted assemblies and any item modified after delivery.
Hazardous materials, including lubricants and chemicals, once the seal is broken.
Items returned without an RMA number, which are held for 14 days and then disposed of.

Credit and warranty

4. Restocking

Stock returns accepted for credit are subject to a 15% restocking charge, waived where the return arises from a supplier error or a warranty failure. Credit is issued at the price invoiced, net of the charge, within ten working days of the goods being received and inspected.

5. Warranty claims

Goods are warranted free from defects in material and workmanship for twelve months from delivery. Submit the invoice number, the part number, the date the defect appeared and a description of the application. The supplier may request the goods for inspection before determining the claim. Remedy is limited, at the supplier's option, to replacement of the goods or credit of the invoice value. The warranty does not cover fair wear and tear, misapplication, or use outside published specifications.

Logistics and escalation

6. Transport and risk

Return transport is arranged by the customer unless the return arises from a supplier error, in which case the supplier arranges collection. Risk in returned goods passes to the supplier on receipt at the Memphis distribution centre.

7. Escalation

A claim not resolved within 15 working days may be escalated to the customer service manager at escalations@virtoindustrial.example, quoting the RMA number.
